Press Release

MICROPLEX announces yet another, mid-range production / industrial, continuous form laser printer

The SOLID F120 is the newest addition to the MICROPLEX family of *continuous form laser printers*.

Bedford, Ohio – March 21st, 2007: MICROPLEX proudly announces the launch of the newest member of their family of continuous form laser printers, the SOLID F120. The SOLID F120 offers a combination of design criteria and technology-rich features that make it the most cost/performance solution in the mid-range production, continuous form laser printer class. The SOLID F120 is also the first in a new line of products that MICROPLEX will offer that meet the environmentally friendly, RoHS regulations, now enforced in Europe. The SOLID F120 features include: print speed of 120 pages / minute (two-up Letter format), robust monthly duty cycle of 1.3 million pages (two-up Letter format), over 20 print language emulations, customized IPDS/IBM environment connectivity, onboard/no charge Ethernet & USB interfaces, 17" print width, 600 x 600 print resolution LED Array imaging technology and low temperature Xenon Flash fusing system.

"The SOLID F120 is a fine replacement solution for those aging continuous form laser printer installations around the world, that require newer, faster, higher resolution output." states Mark Merhab, Vice President of Sales for MICROPLEX. "This product offers a cost effective solution for applications that require the speed and duty cycle for mid-range continuous form lasers. With Flash Fusion technology and the increased 600x600 print resolution, the F120 is a nice fit for laser quality production of shipping, pallet & product PS labels in the Regional Distribution markets. The F120 product offering fits nicely, for speed & price-point, into our Family of continuous form laser printers. We would love the opportunity to save, Production and Distribution application customers, time and money!" continues Mr. Merhab.

MICROPLEX Electronic Printing Systems, Ltd. is a Bedford, Ohio, based printer manufacturer and is a leader in continuous form laser printers for mid-range production applications.
